Student Technology Fee  
Funding Request Form  
Surplus Funds for Fiscal Year 2006-07  
Northwestern State University of Louisiana  

This document will not be accepted without complete information, detailed budget, specifications of each piece of equipment and pricing.

Prepared by: Michael Matthews  For: Watson Library  
College: Northwestern  Campus: Watson  Department: Library  

Where will requested equipment be located/installed/housed? Bldg. Watson  Room: 115  
Are property policies and procedures in place by the department for equipment requested? Yes  
Delivery to the Student Technology office located in Watson Library, Room 113. Date: TBA  

1. Describe target audience.  
The target audience is all students who receive library instruction for classes, with a focus on economics students, who often thirty (30). This includes all 1010 classes, most ENG 1010 classes, and a majority of foundation courses within each major.

2. Describe project/initiative for which you are requesting funds.  
Currently, Room 115 has only one projector and screen. Room 115 has seating for up to 60 students, but only half of them can actually see the screen. The other half of the class must either sit on the cramped side of the room on simply not participate. Solution: We are asking for one projector and screen for the other half of Room 115.

3. State measurable objectives that will be used to determine the impact/effectiveness of the project.  
Students who receive training and use instruction Room 115 will be able to learn much more effectively. The entire class will be able to participate during instructions presentations.

4. Indicate how each project objective will be evaluated.  
Project objectives will be evaluated by interviewing students and especially faculty about the new facilities.
5. Provide a justification for funding of the project. Estimate the number of students that will be served per academic year and in what ways. Please indicate also any unique needs of the target group.

JUSTIFICATION:
1. According to last year’s data, over 4,000 students used the library instruction service at NSU Libraries. This figure does not include training by STS or other departments.
2. Generation Y students and millennials demand interactive e-learning environments which provide audio/visual and multi-media presentations. Room 115 is also the primary class room for teaching computer and information literacy to these students.

6. If funded, which NSTEP (http://www.mnslis.edu/nstep/NSTEP.pdf) objective will this funding of this project advance? How will funding of the project advance the University and College unit technology plan?

NSTEP Objectives addressed by this project include:
1. It will improve access to technology by students, faculty, and staff.
2. It will provide a classroom with updated technology and multimedia.
3. It will upgrade student technology laboratories because it serves as the primary classroom for Library instruction programs and STS personnel.

University and Unit Goal:
This project will fulfill the university goal of providing "learnable, centered environments," and it will assist in providing "innovative strategies and pedagogy" for both the library instruction programs and STS personnel.

7. List those individuals who will be responsible for the implementation of the project/initiative and indicate their demonstrated abilities to accomplish the objectives of the project.

Jeanne Brown, as the administration of student Technology Services, will assume the positive outcome for this project.
8. Describe any personnel (technical or otherwise) required to support the project/initiative.

1. Personnel from Creative Presentations (eventhink) will be contracted to perform the work.
2. Any remaining technical details will be efficiently handled by STS staff.

9. Provide a schedule for implementation and evaluation.

10. Estimate the expected life of hardware and software. Explain any anticipated equipment/software upgrades during the next five years.

1. Hardware should last 5 years.
2. No software will be used for this project.
3. No upgrades to the projector/projection system are expected.

11. Explain in detail a plan and policy that will be in place to ensure property security/controls for any equipment received through a Student Tech Fee grant.

1. Projector will be fastened to the ceiling of room 115 with metal brackets.
2. Screen will be fastened to the wall of room 115 using masonry screws and brackets.

Thus, both items are immovable.
12. Attach a detailed budget, including: specs., description, cost, state contract number, and vendor for each item; cost of outside support personnel; and a description of how the proposal will support University/College/unit resources (i.e., cash match, funds from other sources, or reallocation of existing hardware/software or other equipment.

13. Attach a letter of support for the project signed by the requesting unit’s Dean, the appropriate Vice President (for non-academic units), or the SGA President from the requesting campus (for student requests).
