

# Linguistics Resources

 <b>northwestern</b> STATE UNIVERSITY LIBRARIES	Reference Division Watson Memorial Library Northwestern State University Natchitoches LA 71497
28 July 2006	

Linguistics is the study of language in all its forms; it concerns itself with the many different facets of language, from the physical properties of the sound waves in speech, to the social context in which conversations are embedded. The various sub-branches of linguistics are concerned with how languages are structured, what they have in common, the range and limits to the differences among them, how they are acquired and used, how they change and so on. –
